Observations	695	695	714	714	714	714	714	714
State and year FE	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Time variant controls	No	Yes	No	Yes	No	Yes	No	Yes

These are DD regressions using 1999-2012 Uniform Crime Reports (Arrests and Rape Offenses) and CDC (Gonorrhea) data. Time variant controls include female population, male population, unemployment rate, share of population below poverty line, share of population in military, share of white population, share of black population, share of population that is male and single, share of population that is female and single, share of population that is male and married, and share of population that is female and married. Panels A and C presents clustered standard errors and Panels B and D presents 5th and 95th percentile confidence intervals from permutation tests and p-values from a two-tailed test. * p<0.10, ** p<0.05, *** p<0.01
